Inspiration for completely new models of speakers can come in many forms. The newest addition to the EgglestonWorks line was born of designer ambition, customer requests, and natural evolution. Taking the position of a true entry-level

model, the Dianne aspires to introduce what is now quite an extensive line of audio excellence.

In an audio world crowded with "breakthroughs", the EgglestonWorks design team has chosen a simple path to create a product that provides its owner

with a truly enjoyable listening experience. With straight-forward design concepts and execution,

The Dianne takes an important place among a line of award-winning products.

The latest EGG.WORKS creation.
