## EXACTLY WHAT IS A SIGNATURE SERIES?

Traditionally, a Signature model features the personal stamp of approval of its designer. In the case of the award-winning EgglestonWorks loudspeakers, we prefer to think of a broader meaning.

And so "Signature" is less about attaching a single person's name to a product, and more about sonics and

the signature EgglestonWorks has put upon the world of audio in general.

With that in mind, we proudly present the Savoy Signature Series as the latest evidence of the non-conformist design principals we champion above all else. The Savoy Signature Series features aluminum panels, high-gloss paint, and new mid-range drivers. Internally, the

crossover has been completely redesigned to further enhance the musicality of an already exemplary performing loudspeaker.

EgglestonWorks is committed to creating products that excel both aesthetically and sonically. We hope you will find our efforts worthy of your trust in our products and our company.

Jim Thompson  
President/Chief Designer
